#### Economic Review of Future Landfill Options for the District of Hope

*SHA was retained for economic review of the future landfill options for the District of Hope. We investigated the operational aspects of Hope Landfill and compared early closure of the landfill and hauling the waste to a regional landfill with continued operation of the landfill site.*

*SHA also reviewed and analyzed the efficiency of the collection system. SHA recommended reducing the number of days per week that the site is open to keep the costs down as well as improve their overall efficiency.*

*Our partner, Owen Carney of Carney's Waste Management recommended switching to Curotto Cans for the curb side collection system in order to improve the overall solid waste collection system efficiency for the district. SHA also looked into prospect of expanding Extended Producer Responsibility Program in the District.*
